**Online Usability Testing for Project 3**

After I move you into your breakout rooms, please follow these steps to conduct your online usability testing on your project 2. Let me know if you have any problems or questions.

1. Email your project 2 to your teammates
2. Decide who is going to fill the roles: proctor (author), participant, data collector 1 who will time the participant and record whether the participant answers the question correctly, data collector 2 who will record the navigation path of the participant while the participant is searching through the document to answer the questions/complete the tasks
3. Have the participant open the document and share their screen with the team
4. Begin test
5. When the test is complete, the participant will finish the survey while the data collectors compete their notes and send them to the proctor
6. Switch roles and begin process again
